April is Autism Awareness Month

The first National Autism Awareness Month was declared by the Autism Society in April 1970. The aim of this month is educate the public about autism. **Autism is widespread, awareness about this condition is not.** In the United States, autism affects 1 in every 110 children. National Autism Awareness Month aims to make the public more aware about this widespread disability and the issues which arise in the autism community. As about 1 in 150 people in America have autism, the chances are that you know someone with this disability. A better informed public will be more empathetic and supportive towards people with autism.
