

# Summer Program 2021

## Week 3: July 12<sup>th</sup> to July 16<sup>th</sup>

Young Achievers Learning Center  
at Mayfair Elementary

# Week 3 was SCIENCE week.

In addition to our regularly scheduled literacy, crafts, athletics and SEL we began daily Science experiments!

## Pictured Below

In teams, students built boats out of tin foil and tested their strength with coins, legos, toys, marbles and acorns! Once the boat sank teams adjusted their design and tried again.

## Pictured Below

Students tested if objects would sink or float in water.

## Pictured Above

Skittles color magic! How will skittles react to different liquids?

## Pictured Above

Walking Water! How does the water get from one cup to the other? With a little bit of magic called capillary action. Essentially, the adhesive force between the paper towel and the water are more powerful than the cohesive force inside the water itself.

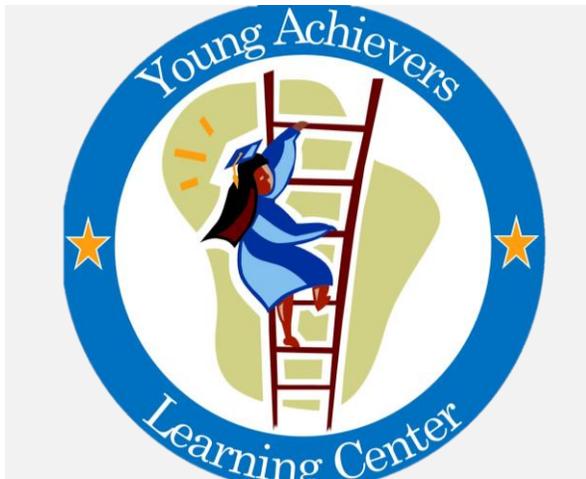

Teams built boats of foil and tested them. The winning foil boat held **129 Lego pieces!!**

How Many Legos  
Will it take to  
Sink?  
Team 11: 11 Legos  
Team 7: 7 Legos  
Team 10: 10 Legos  
Team 8: 8 Legos  
Team 7: 7 Legos  
Team 11: 11 Legos  
**129** Lego Pieces

Our team members doing a great job engaging students during the SDP Academic Time Block.

Individual literacy coaching has been so beneficial to our students!

Above: A fun compromise! Our students really wanted to play catch, but their gym time was still an hour away and it was raining outside. Our staff made paper balls and they played paper toss in the hall!

# Second Step SEL

Two very popular activities during week 3 were “Team Sweep” and “Art About Me”.

Team Sweep had students separate into 2 teams. Each team choose a color.

Teams then used classroom items such a book or folder to “sweep” all their team balls to their designated goal.

Teams made “balls” for their team using colored paper.

All the balls were mixed together and placed in the center of the floor.

At the end we reflected on how team members helped each other.

Sometimes we can do challenging things on our own, but sometimes we need help from our friends or our community.

# Mosaic Art!

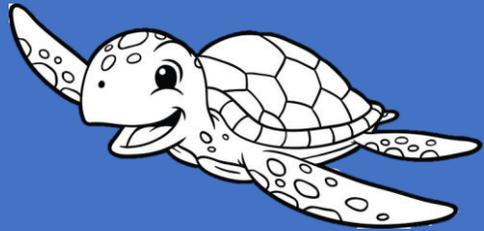

---

Mr. Mike works on mosaic art pieces with our students twice a week. Projects are coming along beautifully!

# More Fun From Week 3

Turtles!

Music Lessons

Vocab Review!

Bananagrams!

# Even More FUN From Week 3!

Fire Drill >

FUN Friday!>

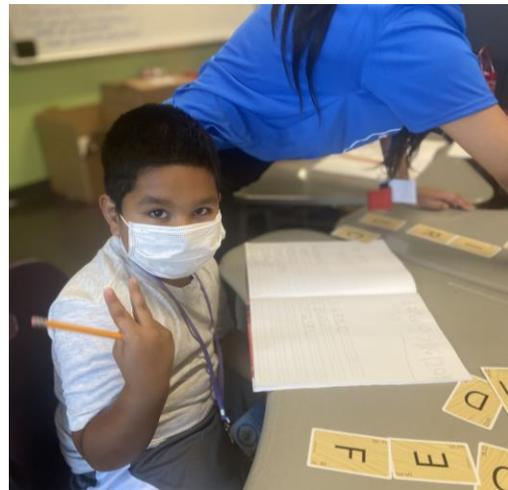

< Gladiator Games Training

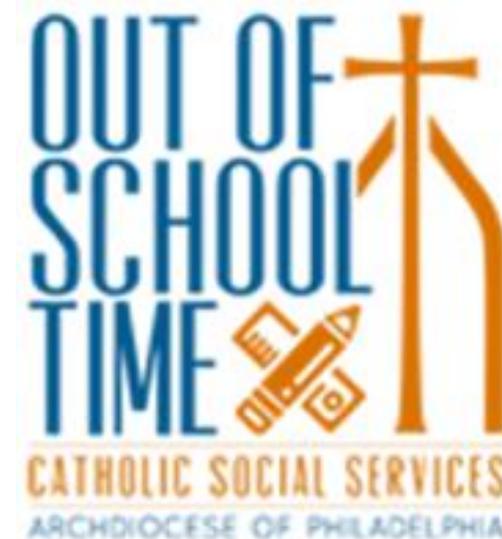

< Youth Choice Games
